

Check In / Check Out and access control via Internet

- Access via Internet: PC, laptop, tablet, cell phone...
- No applications - based on web browser
- Registration and authentication on the server (username / password)
- Change your presence status (check In /check Out)
- Display real-time status (presence information)

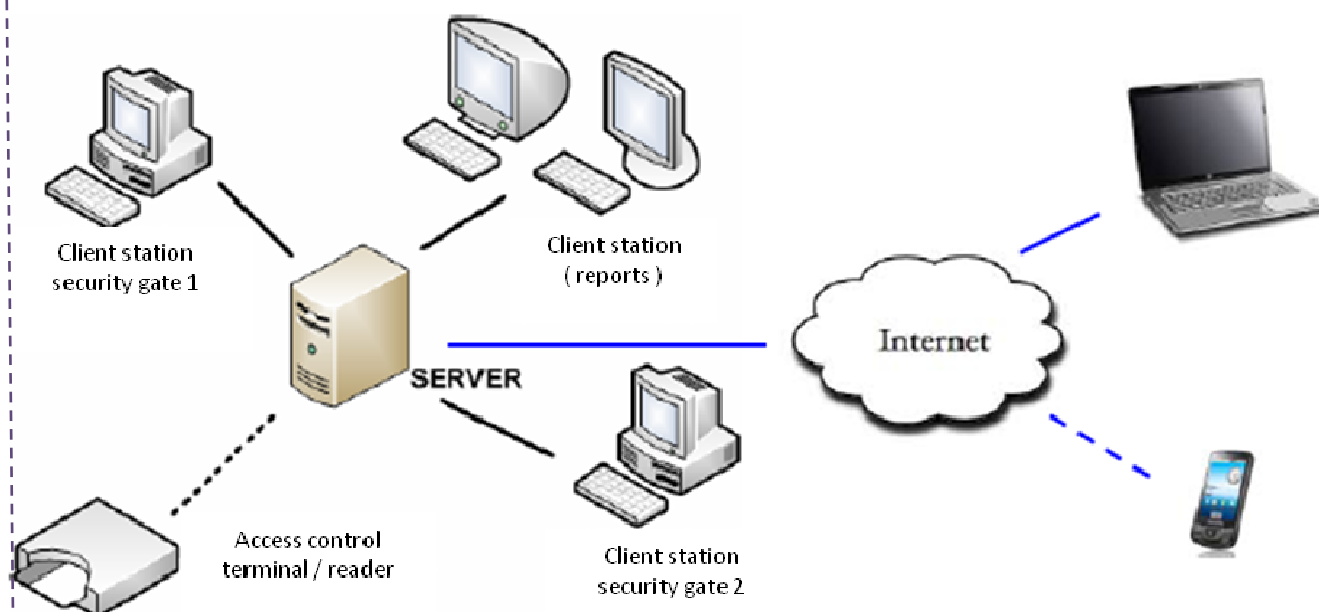

WebTrack CheckIn/CheckOut from any PC, cell phone, tablet device...

Real-time monitoring of presence of employees.

Replaces the use of ID card/ proximity reader for checkin/checkout

Data created in this way are placed in the access control database and can be retrieved and processed by **TimeTrack** time attendance software.

WebTrack can be easily integrated into the framework of the existing access control system.

WebTrack checkIn/checkOut data are treated in the same way as the data collected from the access control ID cards and readers.

Simple but clear, efficient and responsive user interface allows you to set your presence status; to monitor the presence of the employees; to process data (daily, monthly, archived); to generate reports...

Each selected option requires confirmation by the user before it is entered into the database.
